

# Who should get an INFLUENZA vaccination?

## Priority Groups for Influenza Vaccination

- **Adults 65 years old and older**  
Even if you're in great health
- **Children 6 to 23 months old**  
Children younger than 2 years old have one of the highest rates of hospitalization from influenza
- **Adults and children with a chronic medical condition**
- **Women who will be pregnant during the flu season**  
Flu season is typically November through March
- **Residents of nursing homes and long-term care facilities**
- **Children aged 6 months to 18 years on chronic aspirin therapy**
- **Healthcare workers involved in direct patient care**
- **Out-of-home caregivers and household contacts of children younger than 6 months**
